The predominate work to be done at the Dean Nature Sanctuary calls for the Spot Herbicide Treatment. Homer Environmental provided the lowest hourly cost for spot herbicide applications. In reviewing the District's records, the broadcast herbicide work has not been utilized for the work at the Dean Nature Sanctuary for the past several years. ENCAP, Inc. representatives explained their prescribed fire cost was based on conducting the work over a few days.

During the June 20, 2016 Board Meeting, the Board of Commissioners accepted the Bid from Homer Environmental, LLC.
